## EDUCATION

**B.M.S College Of Engineering** **CGPA: 8.8**
*B.E in Computer Science And Engineering (Data Science)* *2023 - 2027*
**Our Own English High School, Sharjah** **Class X: 95 Class XII: 92**
*CBSE X and XII* *2019 - 2023*

## PUBLICATION

**Detection of Pathogenic Mutations in CFTR Variants - IEEE Access Paper**

- Developed an end-to-end **genomic AI pipeline** using **PyTorch**, **Hugging Face Transformers**, **DNABERT2**, and **LoRA adapters** to predict **CFTR** mutation pathogenicity from genomic sequence context.
- Optimized genomic representations through mutation highlighting, context-window tuning, and **XGBoost** hyperparameter optimization, achieving **0.70 ROC-AUC** and **0.81 PR-AUC**.

## PROJECTS

**EventSphere - Event Discovery and Ticketing Platform [GitHub]**

- Built a **microservices** platform of 7 **Python/FastAPI** services behind an API gateway with a **Next.js** frontend, each exposing a **REST** API and owning its own database.
- Implemented event-driven messaging with **RabbitMQ** (idempotent consumers, dead-letter queues) and atomic **Redis** reservations that prevent ticket overselling under concurrent load.
- Containerized 12 services with **Docker Compose** on **PostgreSQL**, secured them with **JWT** role-based auth, and integrated **Razorpay** payments with signature checks and **pytest** suites.

**ClassLogger - Smart Classroom Attendance App [GitHub]**

- Architected a **multi-component biometric system** integrating **Android**, **FastAPI**, and **Firebase** for real-time classroom attendance.
- Implemented a face recognition pipeline using **MTCNN** → **FaceNet** → **KNN**, with **512-D embeddings** and cosine similarity for identity verification.
- Integrated **WiFi SSID/BSSID fingerprinting** for dual-factor validation and reduced attendance time by ∼**85%** for **40+ students**.

**Trabajo AI - Agentic Resume-JD Gap Analysis System [GitHub] [Live]**

- Architected a **4-agent LangGraph pipeline** consisting of parser, retriever, reasoner, and gap analyzer for automated Resume-JD analysis.
- Implemented **ChromaDB**-backed **RAG** to retrieve semantically relevant resume sections and perform candidate-job match and gap analysis.
- Deployed the full-stack system on **Render** and **Vercel** using **FastAPI** and **Groq (Llama 3.3 70B)** for inference.

## TECHNICAL SKILLS

**Programming**: Python, C, HTML, CSS, R

**AI and ML**: Scikit-learn, Pandas, NumPy, Matplotlib, NLTK, Tensorflow, Keras PyTorch, PowerBI, Tableau, LangChain

**Databases**: SQL, Postgres, Redis, ChromaDB

**Cloud & DevOps**: AWS, Docker, Jenkins, Linux

**Backend**: Flask, FastAPI, REST

## CERTIFICATIONS

- **Oracle Cloud Infrastructure**: OCI 2025 Certified Data Science Professional
- **IBM Skills Build**: Build RAG models with Langchain and IBM Granite

## EXTRA CURRICULAR

**DSync Club – Data Science Club, BMSCE** **July 2025 – Sep 2026**
*Secretary*

- Organized and managed SHECODES hackathon with **200+ participants**, overseeing event planning and execution.
- Conducted **hands-on Git workshops**, introducing students to version control and collaborative software development.
- Managed club funds for operations, sponsorship acquisition, and logistics, ensuring **budget optimization** for 8 events.
